Welcome to Model Engineer

Model Engineer is the premier UK model engineering magazine. It has been published for over 100 years. Content includes constructional articles, interesting articles on engineering related topics and many other varied subjects about models and model engineering.

Model Engineers' Workshop is a relative newcomer, first published in 1980. It is much more concerned with machines, both manual and CNC, tools, methods and processes. Historically, it does not include articles on the construction of models. It usually contains drawings for the construction of a machine, a tool or a machine accessory.

Latest Model Engineer

The next issue of **Model Engineer** in the shops is issue 4352. This should hit subscriber's doorsteps on 16 May and will be in the newsagent on the 22 of May.

Latest Model Engineers Workshop
